Paper 2 Human geography and geography fieldwork investigation

Thursday 24 May 2018 Morning Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- a pencil
- a rubber
- a ruler.

You may use a calculator.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions in Section A.
- Answer Question 2 in Section B.
- Answer either Question 3 or Question 4 in Section B.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked

Information

- The marks for questions are shown in brackets.
- The total number of marks available for this paper is 80.

Question 1	Changing places	
0 1.1	Which would be the best type of map to show cultural and social difference place that you have studied?	
		[1 mark]
	A Trip line map	0
	B Flow line map	0
	C Choropleth map	0
	D Desire line map	

0 1.2	A student was categorising the global and local connections identified in the place being studied.		
	In which of the following lists have these connections been correctly categorised? [1 mar		
	Global	Local	
	A Dairy products produced on nearby farms are sold by retailers in the town but some are exported.	There is a cement works in town that employs migrant workers from the European Union.	
	B The products from the cement works are transported across the UK.	The town's community groups collaborated to raise the funds for a skate park although it is used by outsiders.	
	C The local cement works is now owned by a multi-national company that has its headquarters in the UK.	There is a network of retailers in the town who help to organise an annual festival to showcase farm-produced food.	
	D The council has developed links with a town in Germany as part of a drive to promote tourism in the local area.	The percentage of international tourists increased in recent years, especially those from long-haul destinations.	
0 1.3	Outline the cultural characteristics or that you have studied.	social inequalities you found in the local place [3 marks]	
	Question 1 continues	on the next page	

Figure 1a is an extract from Salford City Council about the Salford Quays regeneration project.

Figure 1b is an advertisement from an urban regeneration company.

Figure 1c is a recent photograph of Salford Quays.

Figure 1a

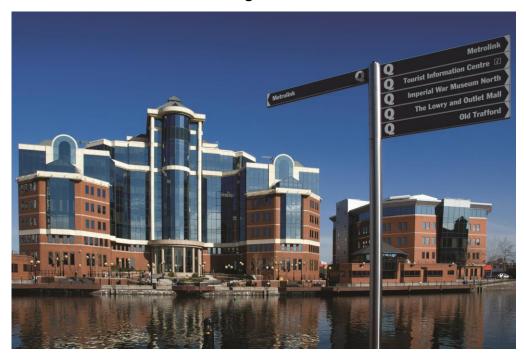

From major developments to city parks, revitalised waterways and green spaces, Salford is being rebuilt and now more people than ever before are choosing it as a place to live, work, invest in and visit. It is also investing in its transport infrastructure, both to improve connectivity and to support the sustainable growth of the city.

Salford is connecting the city and its residents to the growing opportunities in and around the area and helping to secure jobs, investment and a regeneration focus towards those areas in greatest need.

Figure 1b

0 1.4	Using evidence from Figures 1a , 1b and 1c , analyse the way in which this place is represented.
	[6 marks]
	Question 1 continues on the next page

0 1.5	Discuss how continuity and/or change in the built environment have affected perceptions of a local place that you have studied. Refer to both your own perceptions and the perceptions of others.	
		[9 marks]

		1 _
0 1.6	For a distant place that you have studied, assess the extent to which flows of people have been important in developing the character of this place. [20 marks]	Do not outside bo

Section B

	Geography fieldwork investigation and geographical skills		
	Answer Question 2 and either Question 3 or Question 4.		
Question 2	Outline one ethical consideration you should think about when collecting geographical data. [2 marks]		
	Question 2 continues on the next page		

Using **Figure 2**, suggest how the map could be a useful starting point for fieldwork investigations into both the physical **and** human geography in this area. **[4 marks]**

Figure 2

Using Figure 2, suggest two limitations of using this map as a planning tool for fieldwork.

[2 marks]

	You have experienced geography fieldwork as part of your course. Use that experience to answer the following questions.	Do not write outside the box
0 2.4	State the aim of your fieldwork investigation.	
	Justify how you analysed your data in order to achieve the aims and objectives of the enquiry. [6 marks]	
	Question 2 continues on the next page

Do not write outside the box There are no questions printed on this page Turn over for the next question DO NOT WRITE ON THIS PAGE ANSWER IN THE SPACES PROVIDED

Answer either Question 3 or Question 4.

Question 3 (If you answer this question do not answer Question 4)

0 3

A student was planning a fieldwork investigation into differences between areas in her local town, Blackburn.

Figure 3 shows some background information used as part of the preparation stage for the investigation.

Figure 3

Many urban geography investigations focus on the inequalities between different areas within a city. By recording, mapping and analysing spatial variations in different features and indicators, an investigation can then start to examine the cause and effect of such inequality, or the impact of planning decisions or redevelopment schemes.

The diagram below shows a model of how quality of life varies along a cross-section through a large city in the UK.

[This diagram cannot be reproduced here due to third-party copyright restrictions.]

I4

From this information the student developed the aim, a hypothesis and key questions as part of the fieldwork investigation, which are shown in **Figure 4**.

Figure 4

Aim: To investigate whether a medium-sized town (Blackburn) would have a pattern of housing quality similar to that found in a large city.

Hypothesis: Blackburn will have the same pattern of housing quality that is found in large cities.

Key questions:

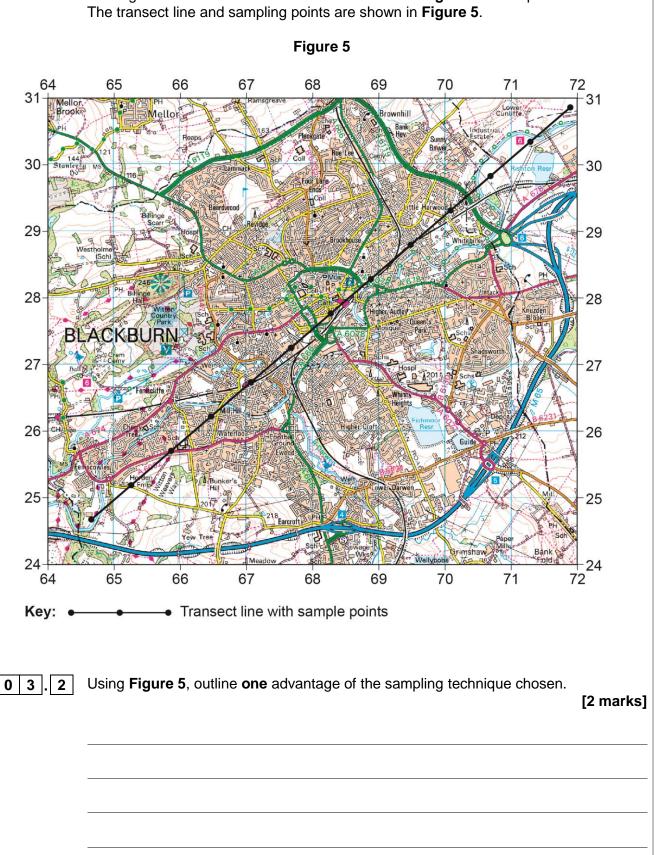

Does Blackburn have clearly identifiable spatial variations in housing quality from the central area to the edge of the town?

Has Blackburn developed a pattern of housing quality that is similar to a large city?

0 3.1	Using Figure 4 , suggest what further background reading or research would be useful for the student before planning the investigation in more detail.
	[4 marks]

Question 3 continues on the next page

Figure 5 is taken from a 1:50 000 OS map showing the sites for the fieldwork investigation. The student chose a transect across **Figure 5** to sample the data. The transect line and sampling points are shown in **Figure 5**.

16

0 3.3	Using Figure 5 , outline one health and safety risk that the student would need to consider when using this sampling technique to collect data.	Do not write outside the box
	[2 marks]	
	Question 3 continues on the next page	

Figure 6 gives the data collection methods used by the student to carry out the fieldwork investigation.

Figure 6

Primary Data Collection

Date: 1st June 2017 Time: 10am – 4pm

- Housing condition assessed and given a score of 1–5 for each location
 (1 = poor quality; 5 = high quality)
- Type of housing categorised and given a score of 1–5 for each location
 (1 = terraced housing; 5 = large, detached housing)
- Photographs taken at each location.

Secondary Data

- Aerial photographs and OS maps to identify housing types and density of housing
- Census data on housing type and occupancy across the town.

0 3.4	Using Figures 3 , 4 , 5 and 6 , evaluate the extent to which the planned data c would enable the student to reach valid conclusions.	ollection [9 marks]

End of Question 3	

Question 4 (If you answer this question do not answer Question 3)

0 4 A student was planning a fieldwork investigation into the urban climate of his local town, Blackburn.

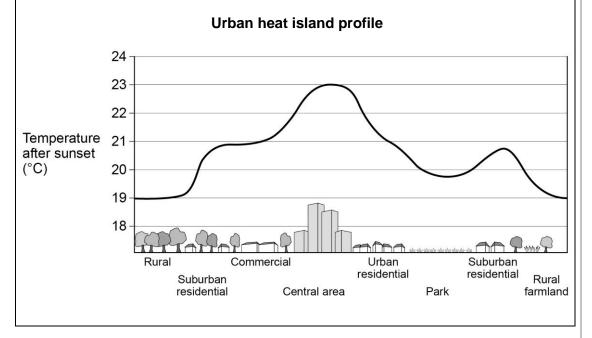

Figure 7 shows some background information used as part of the preparation stage for the fieldwork investigation.

Figure 7

An urban heat island is an area of a city or town that is significantly warmer than its surrounding rural areas. The temperature difference is usually larger at night than during the day, and is most obvious when winds are light.

One cause is the fact that there is little vegetation in urban areas. This means that less energy is used up evaporating water, less of the sun's energy is reflected and more heat is stored by buildings and the ground.

The heat generated by heating, cooling, transport and other energy uses also contributes, particularly in winter, as does the structure of the urban landscape.

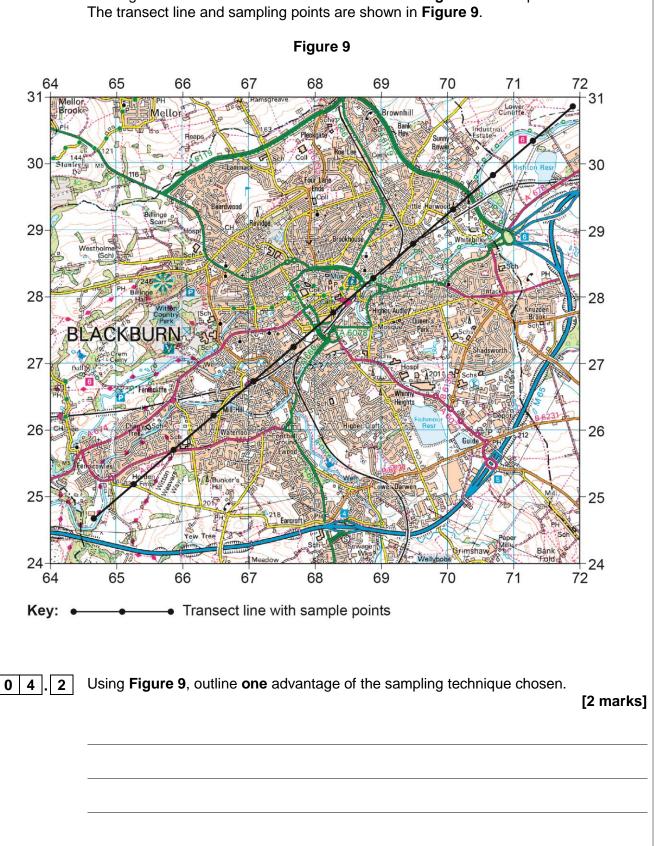

From this information the student developed the aim, a hypothesis and key questions as part of the fieldwork investigation, which are shown in **Figure 8**.

Figure 8

	Aim: To investigate whether a medium-sized town (Blackburn) would demonstrate the urban heat island effect in the same way as larger cities have shown.
	Hypothesis: Blackburn has an urban heat island.
	Key questions:
	Are the highest temperatures recorded in the central area of Blackburn?
	Are the highest temperatures recorded where there is less vegetation?
4.1	Using Figure 8 , suggest what further background reading or research would be useful for the student before planning the investigation in more detail. [4 marks]
	Question 4 continues on the next page

Figure 9 is taken from a 1:50 000 OS map showing the sites for the fieldwork investigation. The student chose a transect across **Figure 9** to sample the data. The transect line and sampling points are shown in **Figure 9**.

22

0 4.3	Using Figure 9 , outline one health and safety risk that the student would need to consider when using this sampling technique to collect data. [2 marks]
	Figure 10 gives the data collection methods used by the student to carry out the fieldwork investigation.
	Figure 10
	Primary Data Collection
	Date: 1st June 2017 Time: 10am – 4pm
	Temperature recorded at each location using a smartphone thermometer
	% built-up land estimated and recorded at each location
	Photographs taken at each location.
	Secondary Data
	Aerial photographs and OS maps to identify land use
	Wind speed from eight weather stations in the area.
0 4.4	Using Figures 7 , 8 , 9 and 10 , evaluate the extent to which the planned data collection would enable the student to reach valid conclusions. [9 marks]
