**Mark Scheme for June 2019**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2019

Annotations available in RM Assessor

Annotation	Meaning
	Correct response
	Incorrect response
	Omission mark
	Benefit of doubt given
	Contradiction
	Rounding error
	Error in number of significant figures
	Error carried forward
	Level 1
	Level 2
	Level 3
	Benefit of doubt not given
	Noted but no credit given
	Ignore

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

<b>Annotation</b>	<b>Meaning</b>
<b>DO NOT ALLOW</b>	Answers which are not worthy of credit
<b>IGNORE</b>	Statements which are irrelevant
<b>ALLOW</b>	Answers that can be accepted
( )	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
<b>ECF</b>	Error carried forward
<b>AW</b>	Alternative wording
<b>ORA</b>	Or reverse argument

**Subject-specific Marking Instructions**

**INTRODUCTION**

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

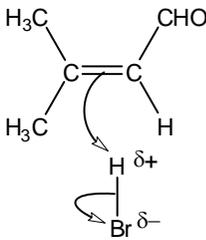

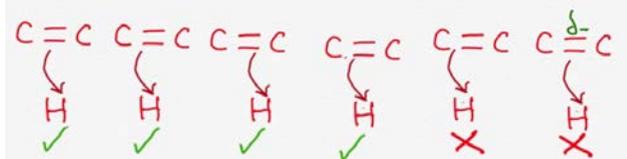

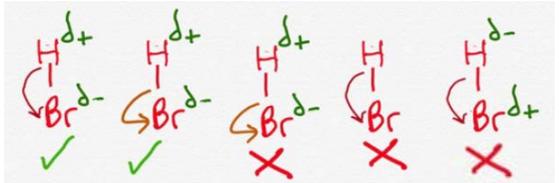

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

## SECTION A

Question	Answer	Marks	AO element	Guidance
1	A	1	AO1.2	
2	D	1	AO2.1	
3	C	1	AO1.2	
4	C	1	AO1.2	<b>ALLOW E</b> (This is the correct term)
5	D	1	AO2.5	
6	A	1	AO2.5	
7	B	1	AO1.2	<b>ALLOW 6</b> (This is the number of chiral centres)
8	C	1	AO1.2	
9	A	1	AO2.5	
10	B	1	AO2.5	
11	A	1	AO2.4	
12	C	1	AO2.5	
13	C	1	AO1.2	
14	A	1	AO1.1	
15	B	1	AO1.2	
	<b>Total</b>	<b>15</b>		

## SECTION B

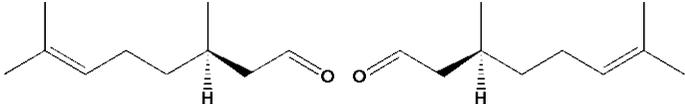

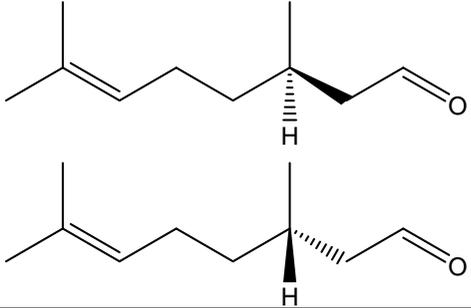

Question			Answer	Marks	AO element	Guidance
16	(a)	(i)	<p><b>ANNOTATE ANSWER WITH TICKS AND CROSSES</b></p>  <p>Curly arrow from C=C bond to H of H-Br ✓  <b>DO NOT ALLOW</b> partial charge on C=C</p> <p>Correct dipole shown on H-Br  <b>AND</b> curly arrow showing breaking of H-Br bond ✓</p>	4		<p><b>NOTE:</b> curly arrows can be straight, snake-like, etc.  but <b>NOT</b> double headed or half headed arrows</p> <p><b>1st curly arrow must</b></p> <ul style="list-style-type: none"> <li>go to the H atom of H-Br</li> </ul> <p><b>AND</b></p> <ul style="list-style-type: none"> <li>start from, <b>OR</b> be traced back to <b>any point across width</b> of C=C</li> </ul>  <p><b>2nd curly arrow must</b></p> <ul style="list-style-type: none"> <li>start from, <b>OR</b> be traced back to <b>any part of</b> <math>\delta^+H-Br\delta^-</math> bond</li> </ul> <p><b>AND</b></p> <ul style="list-style-type: none"> <li>go to <math>Br\delta^-</math></li> </ul> 

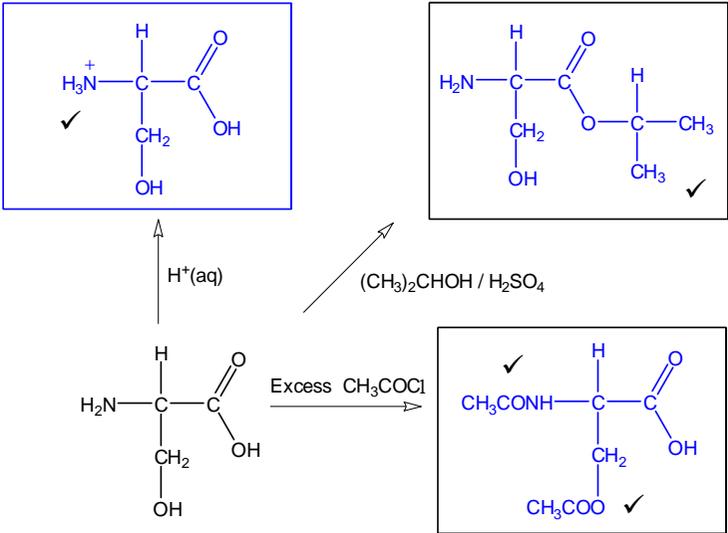

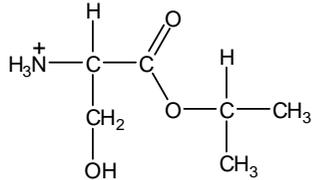

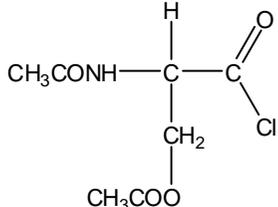

Question			Answer	Marks	AO element	Guidance
			intermediate/carbocation ✓  (major product forms from a) tertiary carbocation <b>OR</b> carbocation bonded to more C atoms / more alkyl groups <b>OR</b> carbocation bonded to no H atoms ✓		AO1.1    AO1.2	<b>ALLOW</b> carbonium ion or cation  <b>IGNORE</b> descriptions of the major/minor product in terms of Markownikoff's rule e.g. H atom joins to C with most H  <b>IGNORE</b> references to stability of the product  ----- <b>ALLOW ORA</b> , i.e.  (minor product forms from) least/less stable intermediate/carbocation ✓  (minor product forms from a) secondary carbocation <b>OR</b> carbocation bonded to fewer C atoms / more alkyl groups <b>OR</b> carbocation bonded to H atoms ✓ -----
	<b>(b)</b>	<b>(i)</b>	Tollens' (reagent) ✓	<b>2</b>	AO1.2	<b>ALLOW</b> ammoniacal silver nitrate <b>OR</b> Ag <sup>+</sup> /NH <sub>3</sub>

Question			Answer	Marks	AO element	Guidance
			Silver (mirror/precipitate/ppt/solid) with citronellal/the aldehyde ✓		×2	<p><b>ALLOW</b> black ppt <b>OR</b> grey ppt</p> <p><b>IGNORE</b> references to acidified dichromate reacting with <b>both</b> compounds</p> <p>-----</p> <p><b>ALLOW</b> 2,4-DNP/2,4-DNPH <b>ALLOW</b> Brady's reagent ✓</p> <p>Yellow/orange/red precipitate with citronellal/aldehyde/carbonyl group ✓</p> <p>-----</p> <p><b>IF</b> other reagents are seen, contact your Team Leader</p>
	(b)	(ii)	C <sub>10</sub> H <sub>18</sub> O ✓	1	AO1.2	<b>DO NOT ALLOW</b> C <sub>10</sub> H <sub>17</sub> OH
	(b)	(iii)	<p>Same <b>molecular</b> formula <b>AND</b> Different <b>structural</b> formulae ✓</p> <p><b>OR</b></p> <p>Both (geraniol and citronellal) have the molecular formula C<sub>10</sub>H<sub>18</sub>O <b>AND</b> Different <b>structural</b> formulae ✓</p>	1	AO1.1	<p>Same formula is <b>not</b> sufficient <i>(no reference to molecular)</i></p> <p>Different arrangement of atoms is <b>not</b> sufficient <i>(no reference to structure/structural)</i></p> <p>For structural formulae, <b>ALLOW</b> structure/displayed/skeletal formulae/functional groups</p> <p><b>DO NOT ALLOW</b> any reference to spatial/space</p> <p><b>ALLOW ECF</b> from incorrect molecular formula in (b)(ii)</p>
		(iv)	Same structural formula	1	AO1.1	<b>ALLOW</b> structure/displayed/skeletal formula

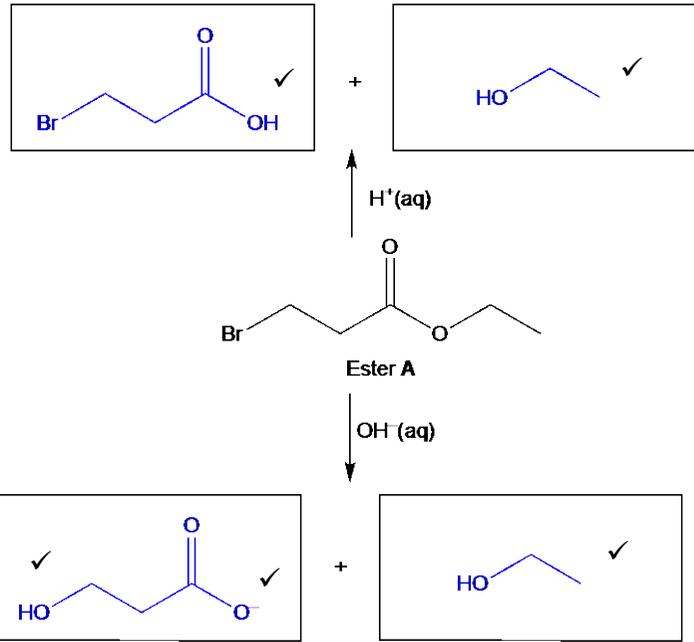

Question	Answer	Marks	AO element	Guidance
	<p><b>Citronellal:</b>            chiral/asymmetric C at carbon-3  <b>OR</b> carbon-3 is bonded to 4 different groups  <b>AND</b>            optical isomerism ✓</p> <p>Two 3D structures of citronellal that are mirror images ✓</p> <p>e.g.</p> 		<p>AO1.2</p> <p>AO2.5</p>	<p><b>ALLOW</b> identification of carbon-3 from 3D structure citronellal if not stated in text or diagram</p> <p><b>IGNORE</b> connectivity of groups around chiral C</p> <p>In citronellal,  <b>ALLOW</b> C<sub>6</sub>H<sub>11</sub> <b>OR</b> R to represent alkenyl chain  <b>ALLOW</b> C<sub>2</sub>H<sub>3</sub>O to represent CH<sub>2</sub>CHO</p> <p><b>IF</b> structural formula of alkenyl chain is used  <b>IGNORE one</b> small slip in one/both isomers            e.g. (CH<sub>3</sub>)<sub>2</sub>CHCH<sub>2</sub>CH<sub>2</sub> (<i>missing carbon-7</i>)</p> <p><b>ALLOW</b> two 3D structures with 2 groups swapped            e.g.</p> 
	<b>Total</b>	<b>13</b>		

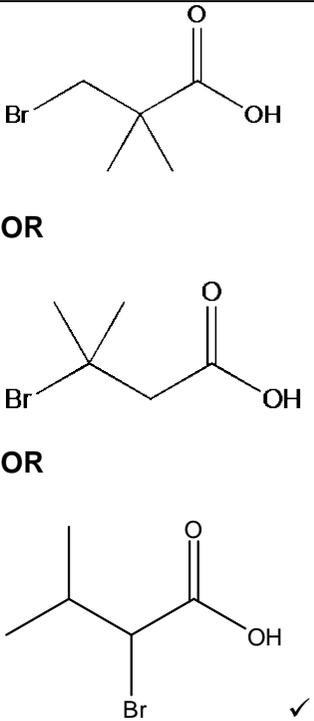

Question	Answer	Marks	AO element	Guidance
