A-level PSYCHOLOGY

Paper 1 Introductory topics in psychology

Time allowed: 2 hours

Materials

For this paper you may use:

- a calculator.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions. You must answer the questions in the spaces provided. Do **not** write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 96.
- Questions should be answered in continuous prose. You will be assessed on your ability to:
 - use good English
 - organise information clearly
 - use specialist vocabulary where appropriate.

TOTAL	

Section A

Social influence

Answer **all** questions in this section.

0	1
---	---

Describe how Zimbardo investigated conformity to social roles.

[4 marks]

Extra space

0 4

To assess the questionnaire’s validity, the researcher gave it to 30 participants and recorded the results. He then gave the same 30 participants an established questionnaire measuring locus of control. The researcher found a weak positive correlation between the two sets of results, suggesting that his questionnaire had low validity.

Explain how the validity of the researcher’s questionnaire could be improved.

[4 marks]

0 5

Discuss legitimacy of authority as an explanation for obedience.

[8 marks]

[illegible]

Section B

Memory

Answer **all** questions in this section.

0 6

Apart from the central executive, name and briefly outline **two other** components of the working memory model.

[4 marks]

0 7

Evaluate the central executive as part of the working memory model.

[4 marks]

Section C

Attachment

Answer **all** questions in this section.

Only **one** answer for each question is allowed.

For each question completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

0 9

Annie feeds her newborn baby regularly and they have formed a strong bond.

According to the learning theory of attachment, before any attachment had been formed, the milk Annie gives her baby is best described as:

Shade **one** box only.

[1 mark]

A a conditioned stimulus.

☐

B a neutral stimulus.

☐

C an unconditioned response.

☐

D an unconditioned stimulus.

---	---

Researchers investigated whether the experience of bullying is influenced by attachment type. They interviewed teenagers about their early attachment experiences. Following the interviews, the teenagers were categorised into two groups based on their attachment type:

- **Group 1** – secure attachment in childhood
- **Group 2** – insecure attachment (insecure-avoidant or insecure-resistant) in childhood.

During the interview, the teenagers were also asked about their experience of bullying. They were categorised as either:

- having had experience of bullying, or
- having had no experience of bullying.

Which statistical test would be most suitable to analyse the data in this investigation? With reference to this investigation, explain **three** reasons for your choice of test.

[7 marks]

[illegible]

Section D

Psychopathology

Answer **all** questions in this section.

1 5
