GCSE GEOGRAPHY

Paper 3 Geographical applications

Friday 14 June 2024

Morning

Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- the Pre-release resources booklet (enclosed)
- the OS key insert (enclosed)
- a pencil
- a rubber
- a ruler.

You may use a calculator.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need additional extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The total number of marks available for this paper is 76.
- · HIC is a higher income country.
- · LIC is a lower income country.
- NEE is a newly emerging economy.
- Spelling, punctuation, grammar and specialist terminology will be assessed in Questions 03 and 05.4.

Section B Fieldwork

Answer all questions in this section.

A student investigated the use of public transport in their local area by testing the following hypothesis: 'The cost of fares is the most important factor in encouraging the use of local bus services.'

For one part of the enquiry the student interviewed 50 people to assess views about the local bus service.

Figure 4 shows the results of the interviews.

Figure 4

1. How do you rate the following aspects of the local bus service?

	Very poor	Poor	Reasonable	Good	Very good
Cost of fares	16	21	13	0	0
Availability	7	25	13	5	0
Punctuality	16	13	17	4	0
Cleanliness	0	8	29	9	4

2. What would encourage you to use the local bus service more frequently?

Cheaper fares	23
Increased frequency	14
Shorter journey times	11
Increased parking charges	2

0	4	1	What percentage of the people who were interviewed considered cleanliness to be
			reasonable?

[1 mark]

____%

0 4 2 Complete the pie chart below to show the results of Question 2 in Figure 4. [1 mark] What would encourage you to use the local bus service more frequently? 0% 90% 10% Key Cheaper fares Increased frequency 20% 80% Shorter journey times Increased parking charges 70% 30% **40%** 60% 50% 4 Which of the following would be an appropriate alternative way of presenting the results of Question 2 in Figure 4? Shade **one** circle only. [1 mark] A Dispersion graph **B** Divided bar chart C Line graph **D** Scattergraph 0 4 Suggest the conclusion(s) that the student might reach in relation to the original hypothesis, 'The cost of fares is the most important factor in encouraging the use of local bus services.' [2 marks]

box

A student carried out an investigation to consider the question: 'Do modern business parks have a higher environmental quality than older industrial estates?'

In order to do this the student compared an old industrial estate with a recently developed business park.

Figure 5 shows the data collected at each site.

Figure 5

Survey of main functions

Old industrial estate Business park

Street parking Landscaped car parks

Car repairs/spraying Gym

Metal workshop Computer services/repairs
Sand/gravel distribution Business finance centre

Oil/coal distribution centre Design centre

Parcel distribution centre Car parts distribution warehouse

Wood workshop Business call centre
Furniture retailer Secure storage facility

Environmental quality survey

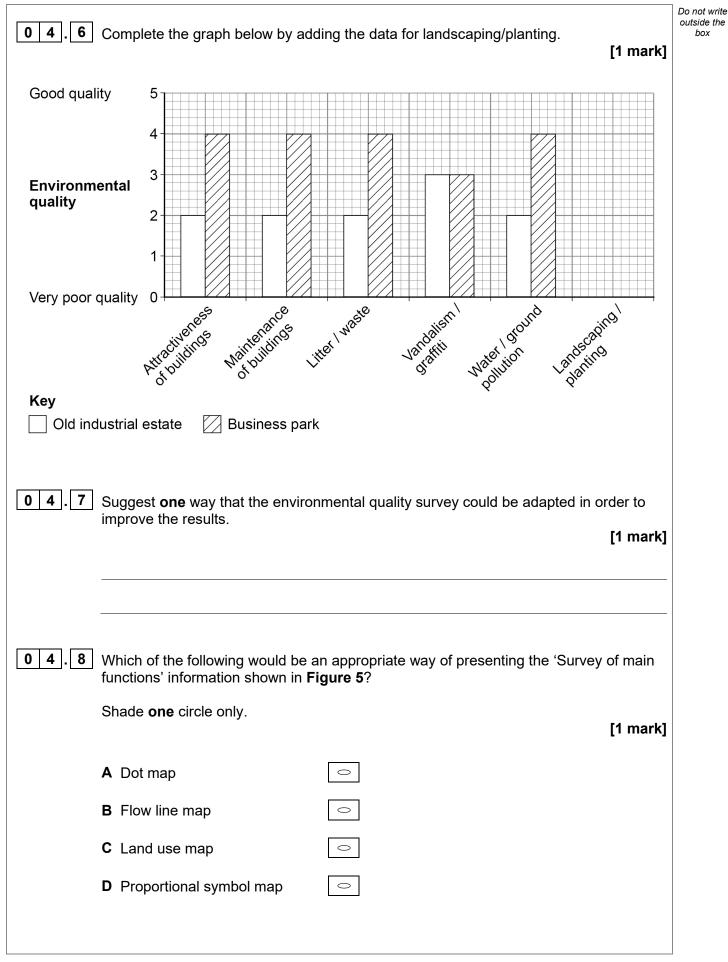

Scores from 0 (Very poor quality) to 5 (Good quality)

	Old industrial estate	Business park
Attractiveness of buildings	2	4
Maintenance of buildings	2	4
Litter/waste	2	4
Vandalism/graffiti	3	3
Water/ground pollution	2	4
Landscaping/planting	1	5
Total Score	12	
Mean Score	2	

0 4 . 5 Complete the environmental quality survey table (in **Figure 5**) by calculating the Total Score and Mean Score for the business park.

[2 marks]

box

As part of a physical geography investigation a group of students wanted to test the hypothesis that: 'The velocity (speed) of a river increases downstream.'

The students used three sites along a river, one kilometre (km) apart. At each site a ball was placed in the centre of the river and the time recorded for it to travel ten metres (m). This was repeated five times at each site.

Figure 6 shows the results of this part of the investigation.

Figure 6

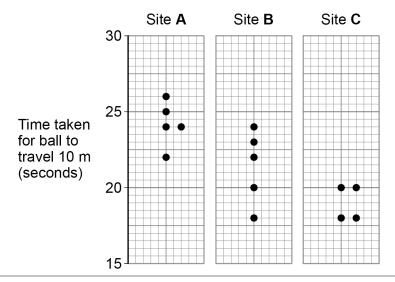

Time taken for ball to travel 10 m (seconds)		
Site A Upstream	Site B	Site C Downstream
26	22	20
24	23	18
22	18	20
24	20	18
25	24	19

Average velocity (speed) (metres per second) =

Average time taken

0 4.9 Complete the dispersion graph below by filling in the missing data for Site C.

[1 mark]

0 4 . 1 0	Suggest one way that the data collection method could be improved. [1 mark]	Do not write outside the box
0 4 . 1 1	To what extent does the data shown in Figure 6 support the original hypothesis, 'The velocity (speed) of a river increases downstream.'? Use the data in Figure 6 to support your answer. [4 marks]
