AS MATHEMATICS

Paper 2

Thursday 23 May 2024

Afternoon

Time allowed: 1 hour 30 minutes

Materials

- You must have the AQA Formulae for A-level Mathematics booklet.
- You should have a graphical or scientific calculator that meets the requirements of the specification.

Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer each question in the space provided for that question.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do **not** write outside the box around each page or on blank pages.
- Show all necessary working; otherwise marks for method may be lost.
- Do all rough work in this book. Cross through any work that you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 80.

Advice

- Unless stated otherwise, you may quote formulae, without proof, from the booklet.
- You do not necessarily need to use all the space provided.

Section AAnswer **all** questions in the spaces provided.

- 1** Line L has equation

$$5y = 4x + 6$$

Find the gradient of a line parallel to line L

Circle your answer.

[1 mark]

$$-\frac{5}{4}$$

$$-\frac{4}{5}$$

$$\frac{4}{5}$$

$$\frac{5}{4}$$

- 2** One of the equations below is true for all values of x

Identify the correct equation.

Tick (✓) **one** box.

[1 mark]

$$\cos^2 x = -1 - \sin^2 x$$

☐

$$\cos^2 x = -1 + \sin^2 x$$

☐

$$\cos^2 x = 1 - \sin^2 x$$

☐

$$\cos^2 x = 1 + \sin^2 x$$

☐

3 It is given that

$$3 \log_a x = \log_a 72 - 2 \log_a 3$$

Solve the equation to find the value of x

Fully justify your answer.

[4 marks]

4 Curve C has equation $y = 8 \sin x$

4 (a) Curve C is transformed onto curve C_1 by a translation of vector $\begin{bmatrix} 0 \\ 4 \end{bmatrix}$

Find the equation of C_1

[1 mark]

4 (b) Curve C is transformed onto curve C_2 by a stretch of scale factor 4 in the y direction.

Find the equation of C_2

[1 mark]

4 (c) Curve C is transformed onto curve C_3 by a stretch of scale factor 2 in the x direction.

Find the equation of C_3

[1 mark]

- 5** A student suggests that for any positive integer n the value of the expression

$$4n^2 + 3$$

is always a prime number.

Prove that the student's statement is false by finding a counter example.

Fully justify your answer.

[3 marks]

6 In the expansion of $(3 + ax)^n$, where a and n are integers, the coefficient of x^2 is 4860

6 (a) Show that

$$3^n a^2 n(n-1) = 87480$$

[3 marks]

6 (b) The constant term in the expansion is 729

The coefficient of x in the expansion is negative.

6 (b) (i) Verify that $n = 6$

[1 mark]

6 (b) (ii) Find the value of a

[3 marks]

Turn over ►

[5 marks]

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- 7 (b)** A circle passes through the points A and B
- A diameter of the circle lies along the x -axis.

Find the equation of the circle.

[4 marks]

Turn over for the next question

Turn over ►

$$y = x^3 + 15x - \frac{18}{x}$$

[5 marks]

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slight shadow on its right side, suggesting it's resting on a surface.

9 A curve has equation

$$y = x - a\sqrt{x} + b$$

where a and b are constants.

The curve intersects the line $y = 2$ at points with coordinates $(1, 2)$ and $(9, 2)$, as shown in the diagram below.

9 (a) Show that a has the value 4 and find the value of b

[3 marks]

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Show that the area of this shaded region is $\frac{16}{3}$

[6 marks]

10

A singer has a social media account with a number of followers. The singer releases a new song and the number of followers grows exponentially.

The number of followers, F , may be modelled by the formula

$$F = ae^{kt}$$

where t is the number of days since the song was released and a and k are constants.

- Two days after the song is released the account has 2050 followers.
- Five days after the song is released the account has 9200 followers.

On the graph below $\ln F$ has been plotted against t for these two pieces of data.

A line has been drawn passing through these two data points.

10 (a) (i) Show that $\ln F = \ln a + kt$

[2 marks]

10 (a) (ii) Using the graph, estimate the value of the constant a and the value of the constant k

[4 marks]

Question 10 continues on the next page

Turn over ►

10 (b) (i) Show that $\frac{dF}{dt} = kF$

[2 marks]

10 (b) (ii) Using the model, estimate the **rate** at which the number of followers is increasing 5 days after the song is released.

[2 marks]

10 (c) The singer claims that 30 days after the song is released, the account will have more than a billion followers.

Comment on the singer's claim.

[1 mark]

END OF SECTION A

Section BAnswer **all** questions in the spaces provided.

- 11** The table below shows the daily salt intake, x grams, and the daily Vitamin C intake, y milligrams, for a group of 10 adults.

Adult	A	B	C	D	E	F	G	H	I	J
x	5.3	6.2	3.6	10.4	2.4	9.4	6	5	7.1	11.2
y	90	145	88	48	114	44	80	95	55	41

A scatter diagram of the data is shown below.

One of the adults is an outlier. Identify the letter of the adult that is the outlier.

Circle your answer below.

[1 mark]**A****B****E****J**

- 12** Which **one** of the following is **not** a measure of spread?

Circle your answer.

[1 mark]

median

range

standard deviation

variance

13

The headteacher of a school wishes to collect the opinions of the students on a new timetable structure.

To do this, a random sample of size 50, stratified by year group, will be selected.

The school has a total of 720 students.

The number of students in each of the year groups at this school is shown below.

Year group	10	11	12	13
Number of students	200	240	150	130

13 (a)

Find the number of students from each year group that should be selected in the stratified random sample.

[3 marks]

13 (b)

State **one** advantage of using a stratified random sample.

[1 mark]

- 14** The discrete random variables X and Y can be modelled by the distributions

$$X \sim B(40, p)$$

$$Y \sim B(25, 0.6)$$

It is given that the mean of X is equal to the variance of Y

- 14 (a)** Find the value of p

[3 marks]

- 14 (b)** Find $P(Y = 17)$

[1 mark]

Turn over ►

- 15** The number of flowers which grow on a certain type of plant can be modelled by the discrete random variable X

The probability distribution of X is given in the table below.

x	0	1	2	3	4	5 or more
$P(X = x)$	0.03	0.15	0.22	0.31	0.09	p

- 15 (a)** Find the value of p

[2 marks]

- 15 (b)** Two plants of this type are randomly selected from a large batch received from a local garden centre.

Find the probability that the two plants will produce a **total** of three flowers.

[3 marks]

15 (c) (i) State **one** assumption necessary for the calculation in part **(b)** to be valid.

[1 mark]

15 (c) (ii) Comment on whether, in reality, this assumption is likely to be valid.

[1 mark]

Turn over for the next question

Turn over ►

- 16** An investigation into the hydrocarbon emissions, X g/km, from cars in the Large Data Set was carried out.

The results are summarised below.

$$\sum x = 128.657$$

$$\sum x^2 = 8.701\,707$$

$$n = 2405$$

where n is the total number of cars which had a measured hydrocarbon emission in the Large Data Set.

- 16 (a) (i)** Find the mean of X

[1 mark]

- 16 (a) (ii)** Find the standard deviation of X

[2 marks]

- 16 (b) (i)** The Large Data Set is a sample taken from the entire UK Department for Transport Stock Vehicle Database.

It is claimed that the values in part **(a)(i)** and part **(a)(ii)** obtained from the Large Data Set should be reliable estimates for the mean and standard deviation of the hydrocarbon emissions for the entire UK Department for Transport Stock Vehicle Database.

State, with a reason, whether this claim is likely to be correct.

[1 mark]

16 (b) (ii) State **one** type of emission where **more than** 80% of the data is known for cars in the entire UK Department for Transport Stock Vehicle Database.

[1 mark]
